

Utopia Shaped 2005

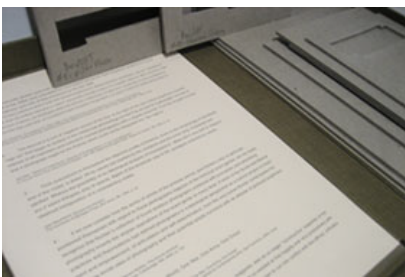

cardboard, archival box
2005-2007

This artist book is part of a series of books that compile several quotes by different authors each of whom uses and ultimately defines the concept of utopia.

I have come across these quotes while reading about different topics in 2005.

Most of the authors presented here don't necessarily write about utopia; nevertheless they bring up this notion as a conceptual frame.

The book holds cardboards cut into shapes corresponding to the areas that these quotes occupy in the original printed text.
